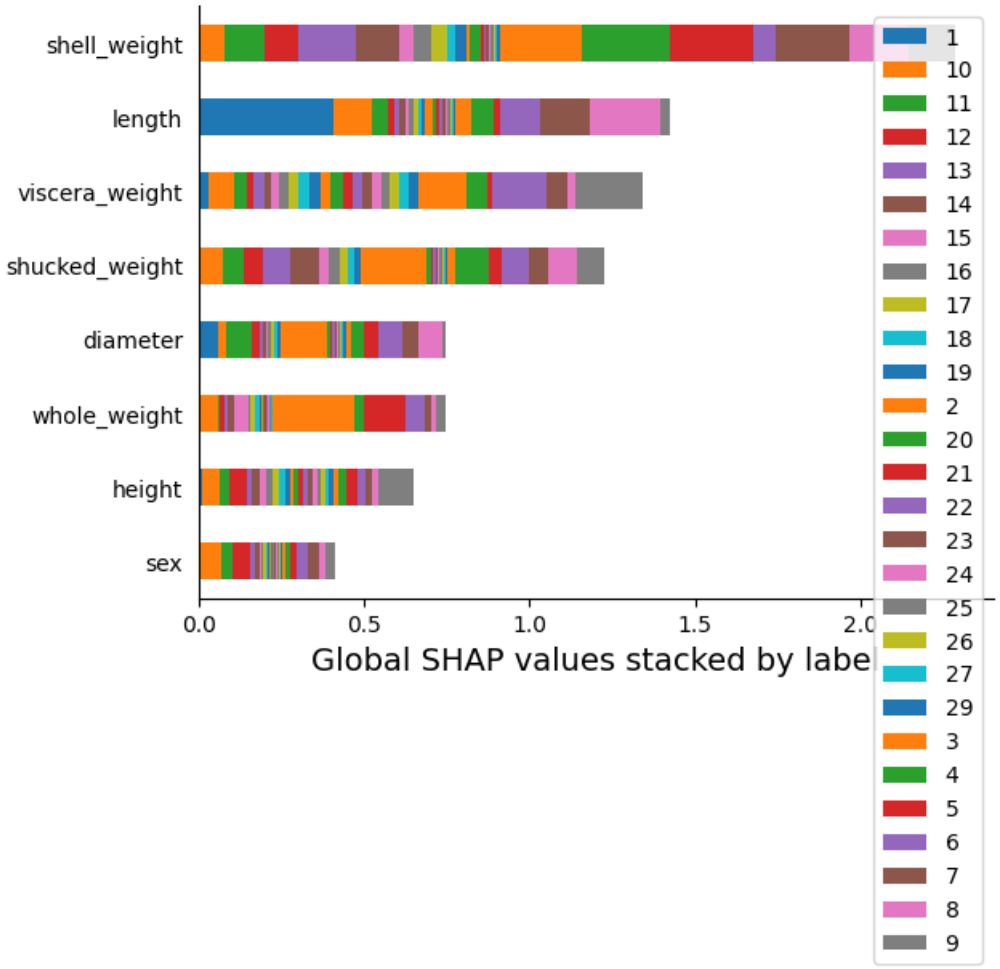
Explainability Report

We report the following SageMaker analysis.

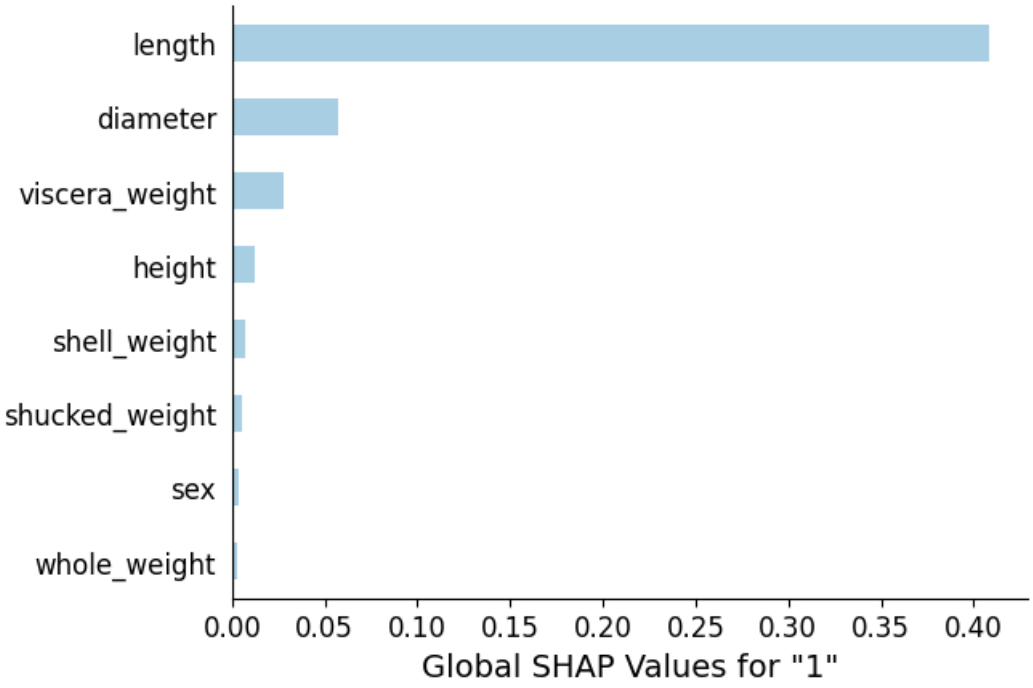
Explanations for all labels

The Model has `8` input features and `28` output labels. We computed KernelShap on the dataset and display the `10` features with the greatest feature attribution summed up over all the labels.



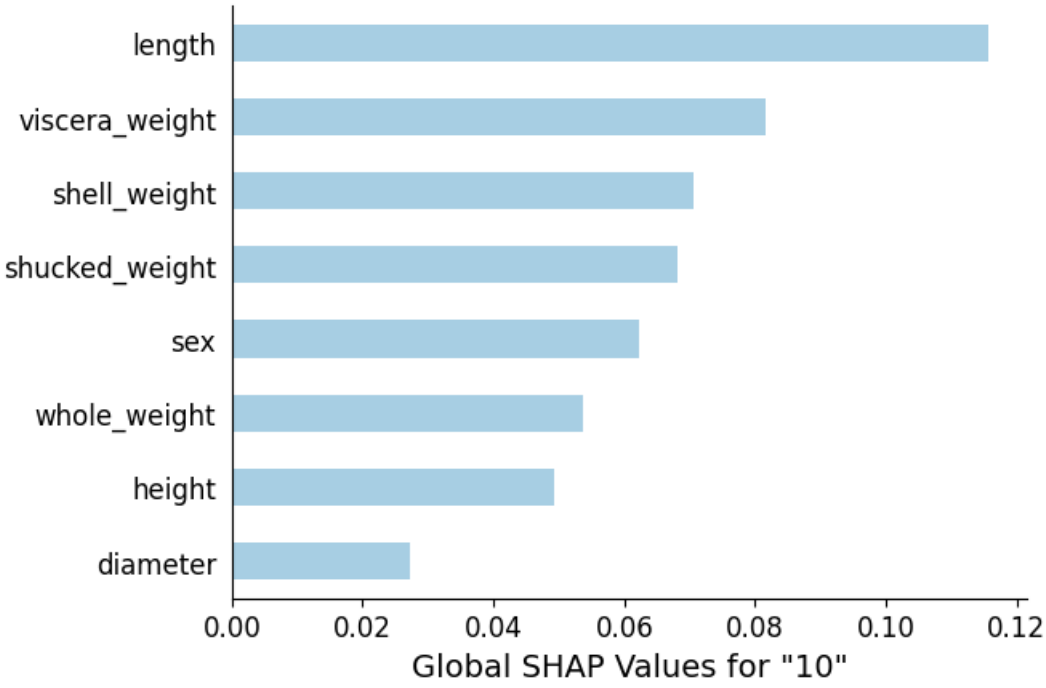
Explanations for "1"

The Model has `8` input features. We computed KernelShap on the dataset `dataset` and display the `10` features with the greatest feature attribution.



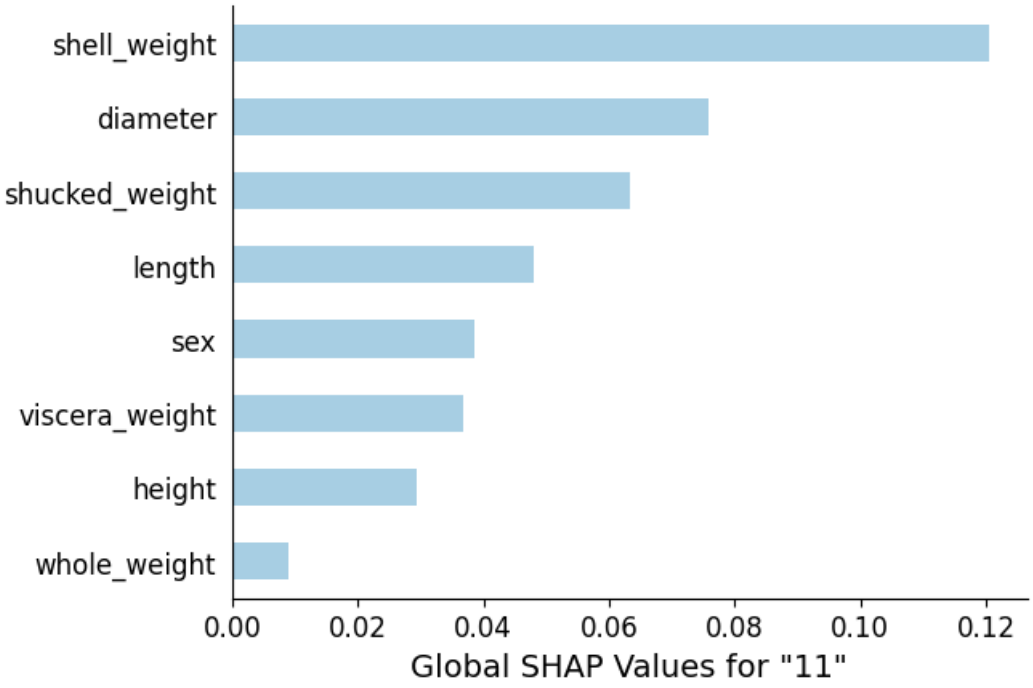
Explanations for "10"

The Model has `8` input features. We computed KernelShap on the dataset `dataset` and display the `10` features with the greatest feature attribution.



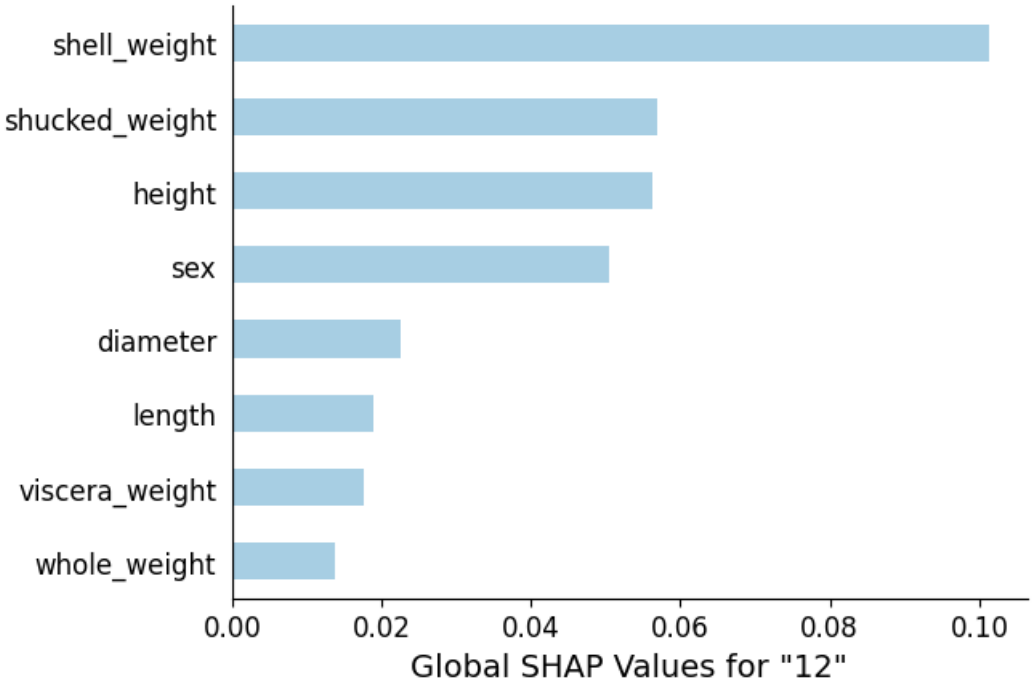
Explanations for "11"

The Model has `8` input features. We computed KernelShap on the dataset `dataset` and display the `10` features with the greatest feature attribution.



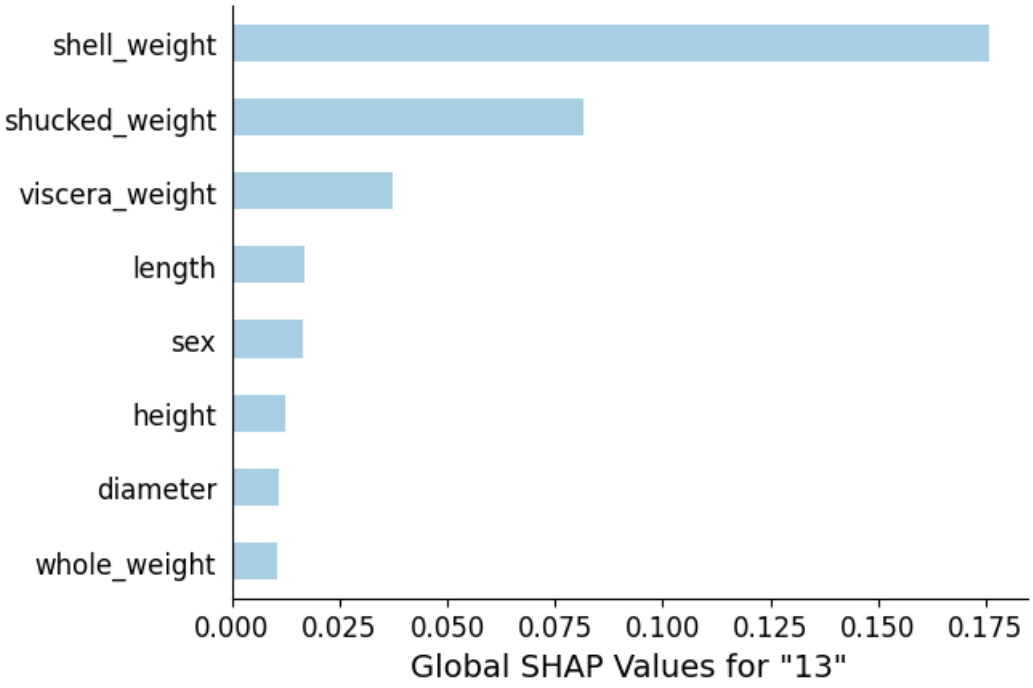
Explanations for "12"

The Model has `8` input features. We computed KernelShap on the dataset `dataset` and display the `10` features with the greatest feature attribution.



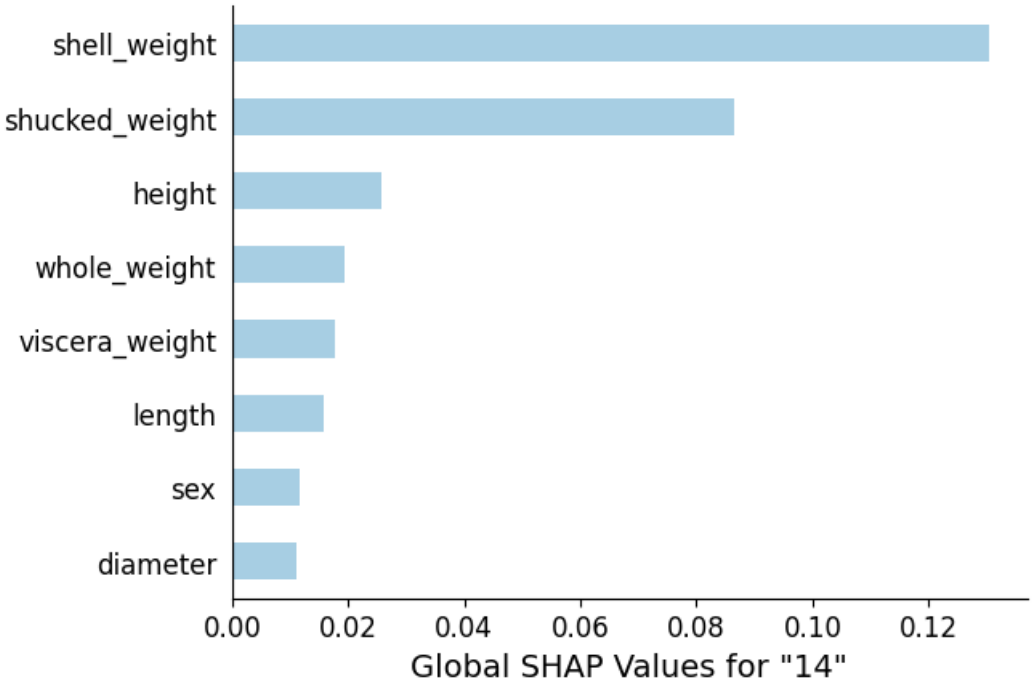
Explanations for "13"

The Model has `8` input features. We computed KernelShap on the dataset `dataset` and display the `10` features with the greatest feature attribution.



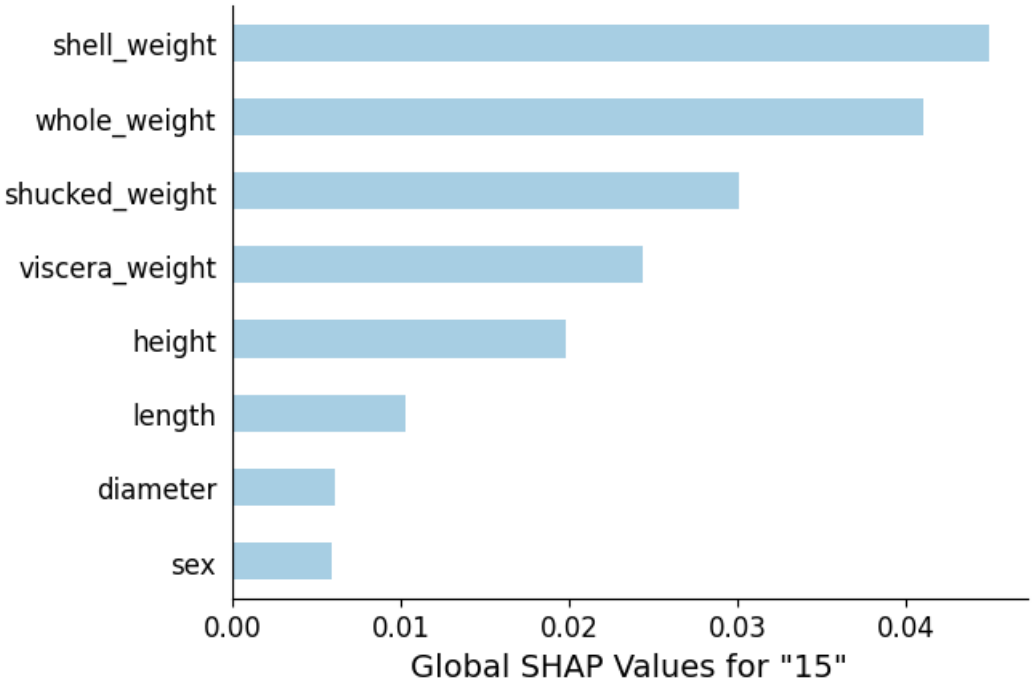
Explanations for "14"

The Model has `8` input features. We computed KernelShap on the dataset `dataset` and display the `10` features with the greatest feature attribution.



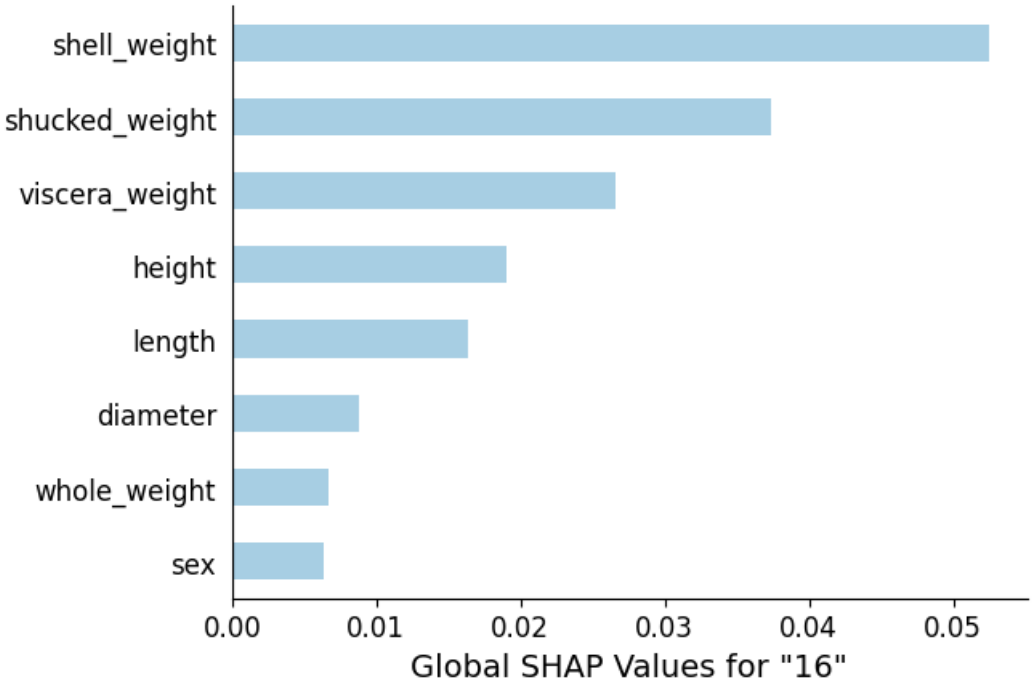
Explanations for "15"

The Model has `8` input features. We computed KernelShap on the dataset `dataset` and display the `10` features with the greatest feature attribution.



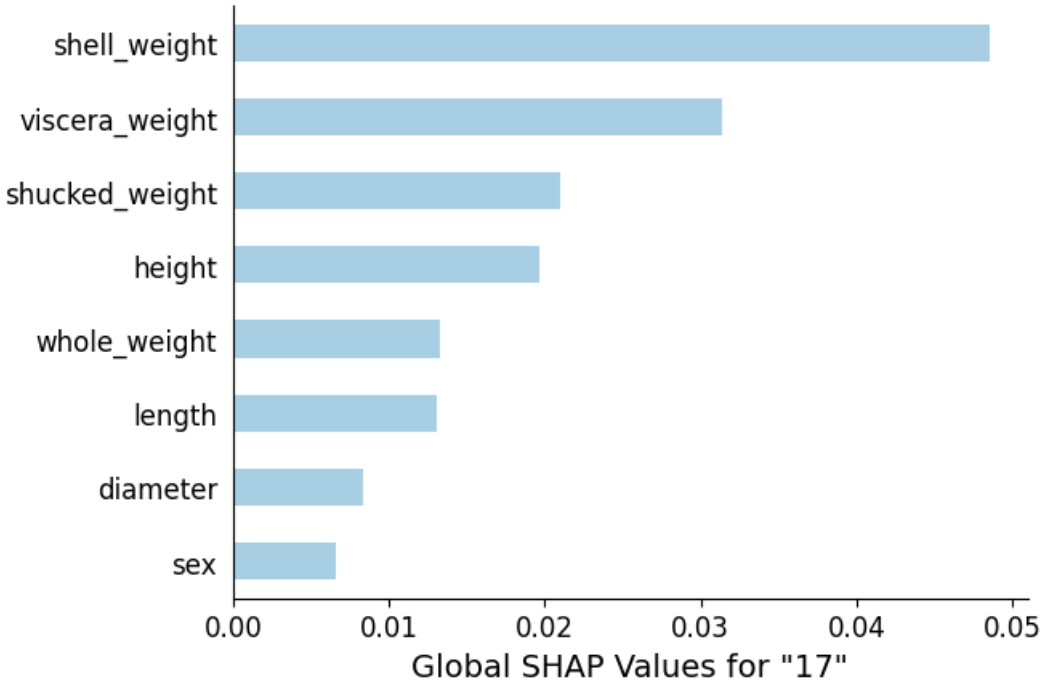
Explanations for "16"

The Model has `8` input features. We computed KernelShap on the dataset `dataset` and display the `10` features with the greatest feature attribution.



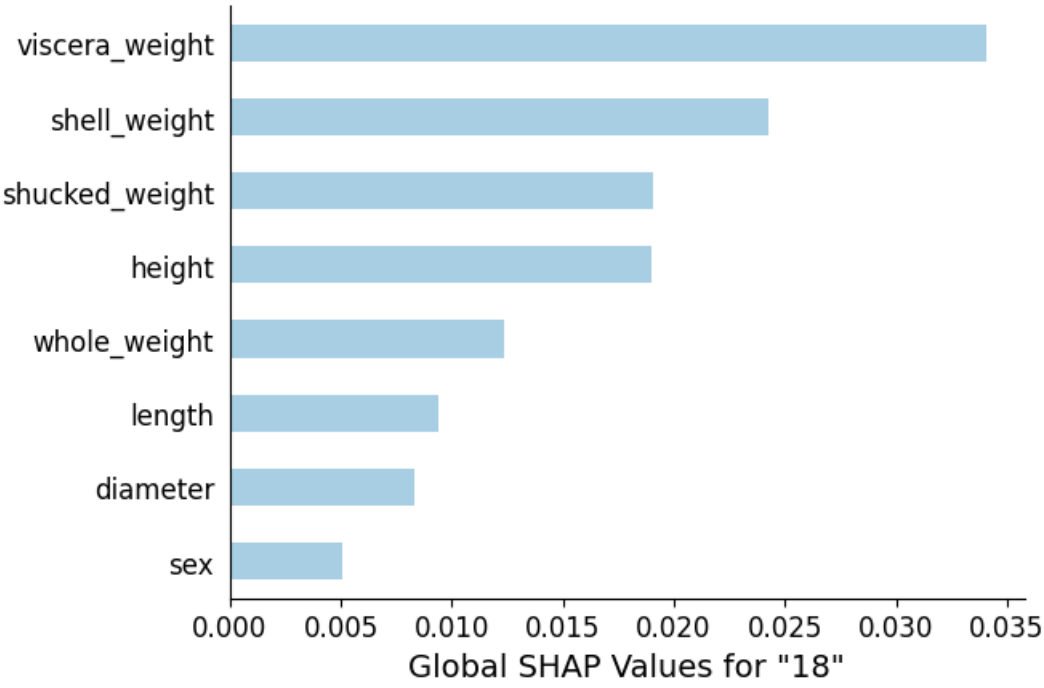
Explanations for "17"

The Model has `8` input features. We computed KernelShap on the dataset `dataset` and display the `10` features with the greatest feature attribution.



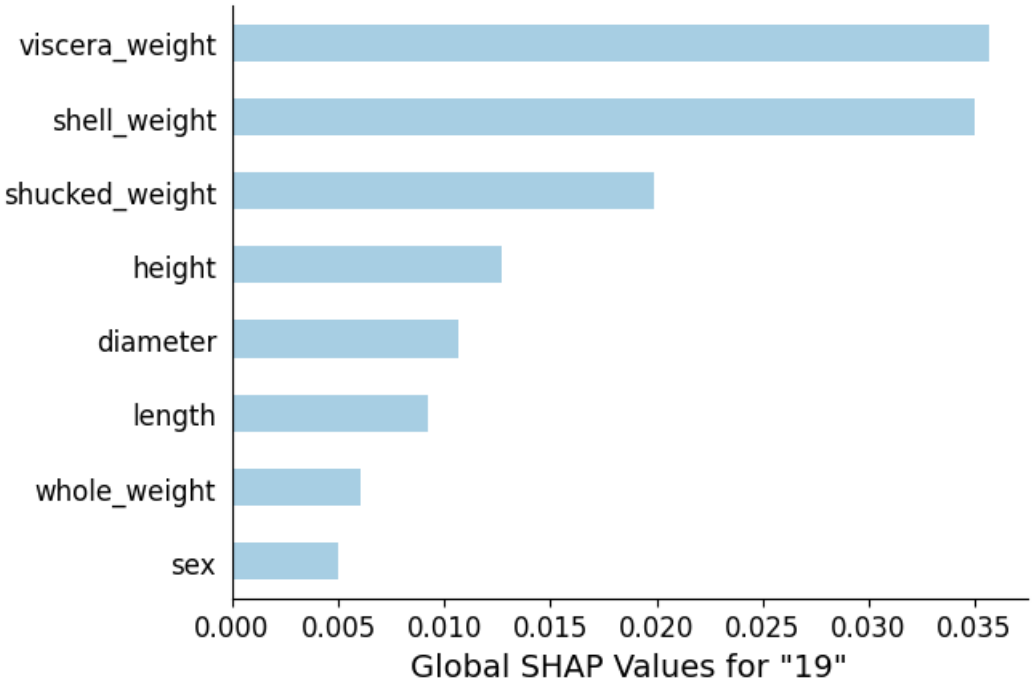
Explanations for "18"

The Model has `8` input features. We computed KernelShap on the dataset `dataset` and display the `10` features with the greatest feature attribution.



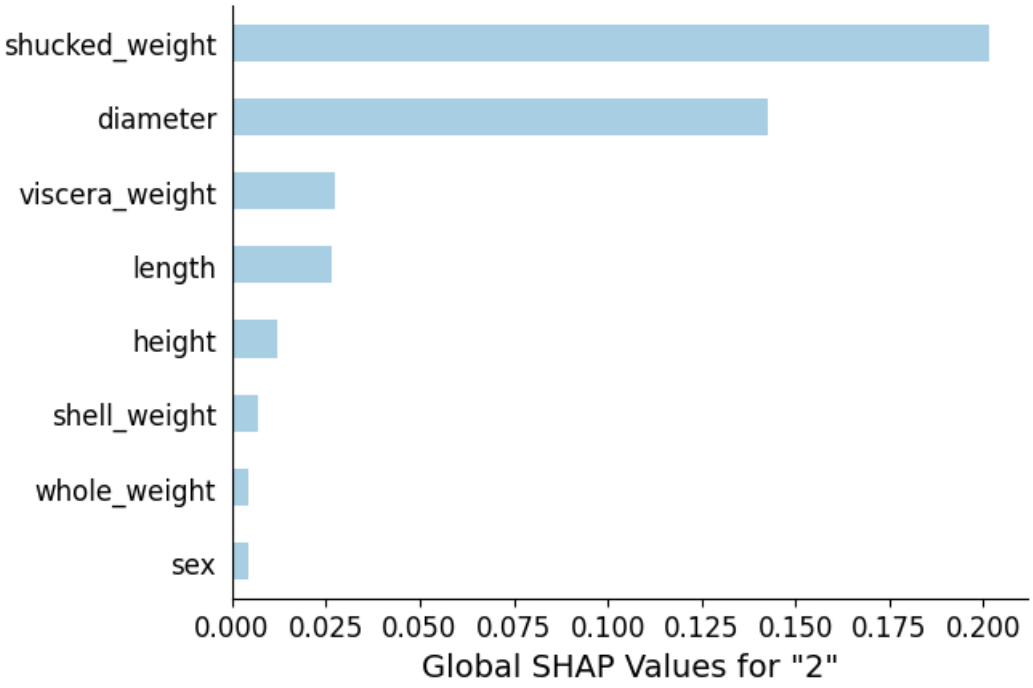
Explanations for "19"

The Model has `8` input features. We computed KernelShap on the dataset `dataset` and display the `10` features with the greatest feature attribution.



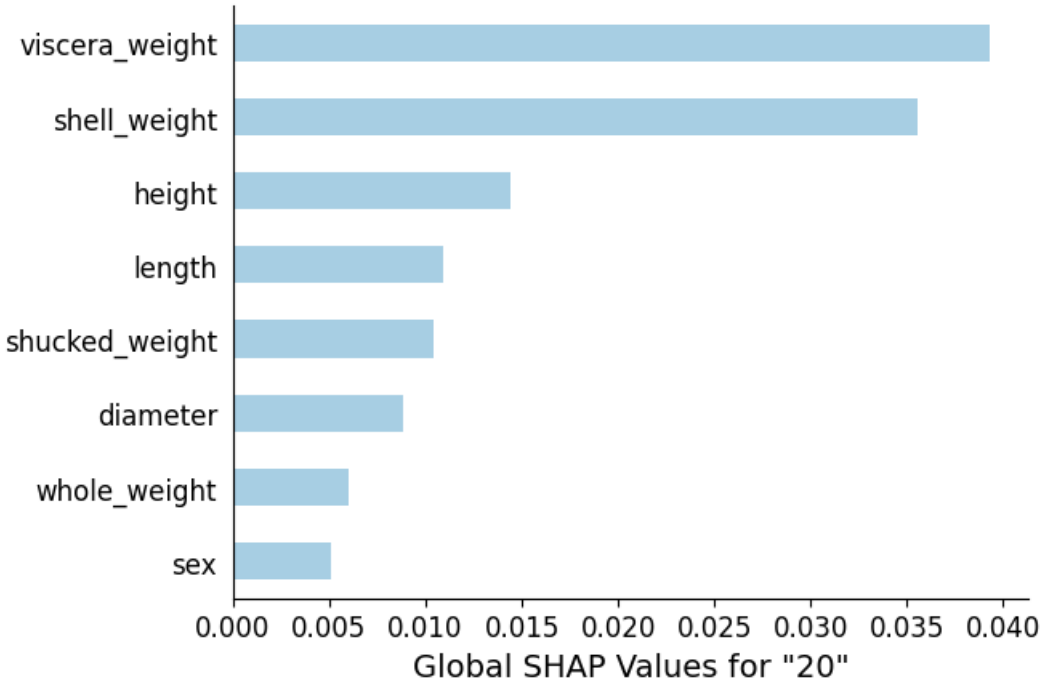
Explanations for "2"

The Model has `8` input features. We computed KernelShap on the dataset `dataset` and display the `10` features with the greatest feature attribution.



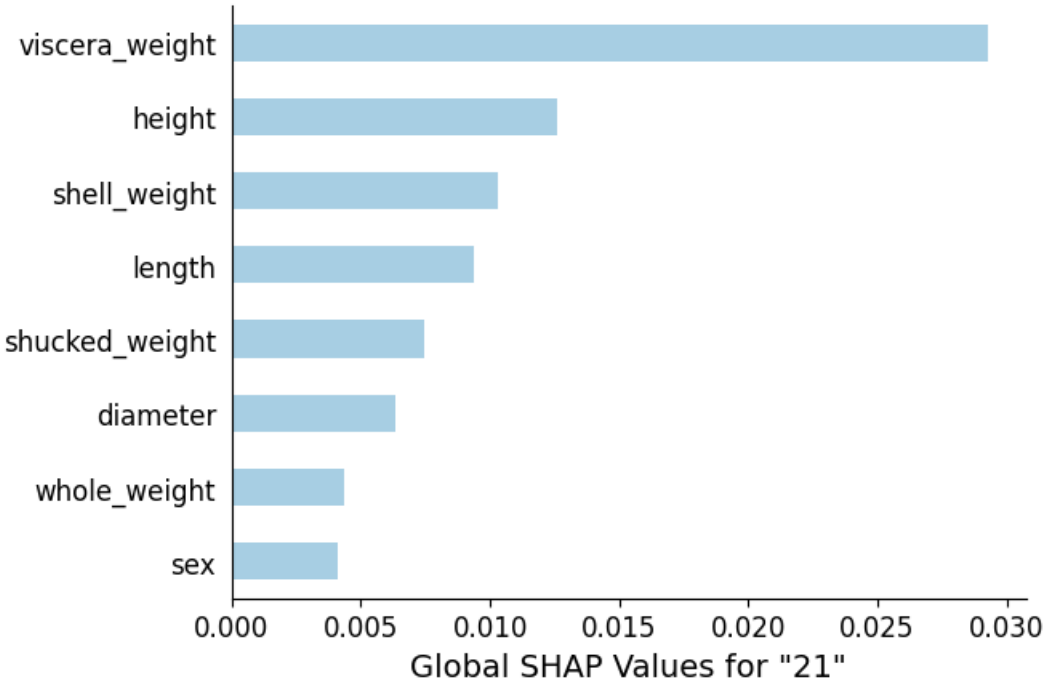
Explanations for "20"

The Model has `8` input features. We computed KernelShap on the dataset `dataset` and display the `10` features with the greatest feature attribution.



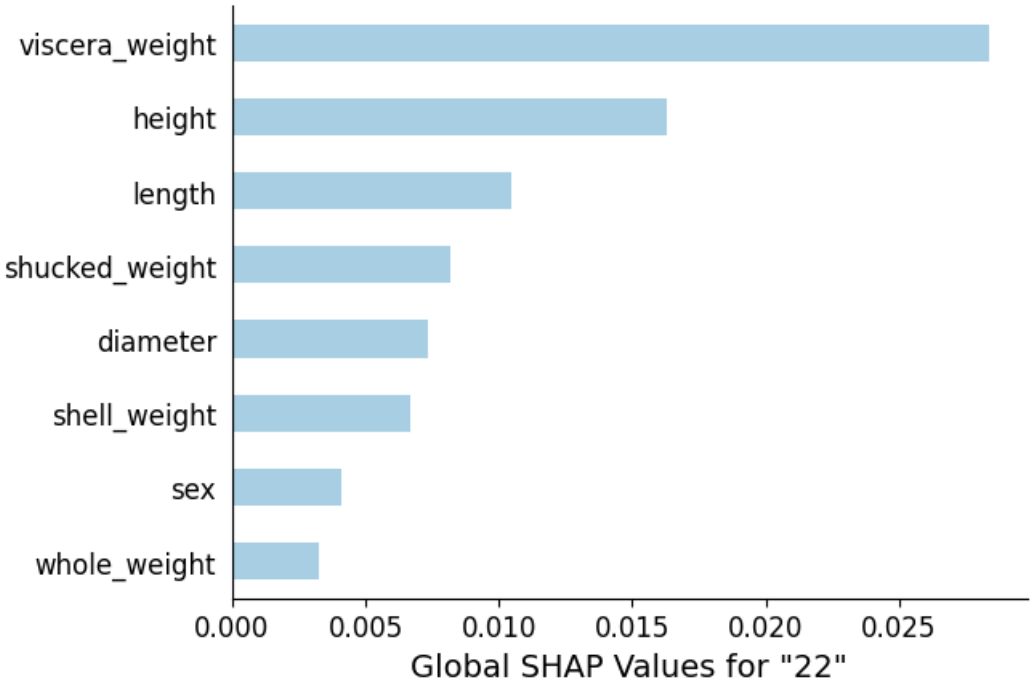
Explanations for "21"

The Model has `8` input features. We computed KernelShap on the dataset `dataset` and display the `10` features with the greatest feature attribution.



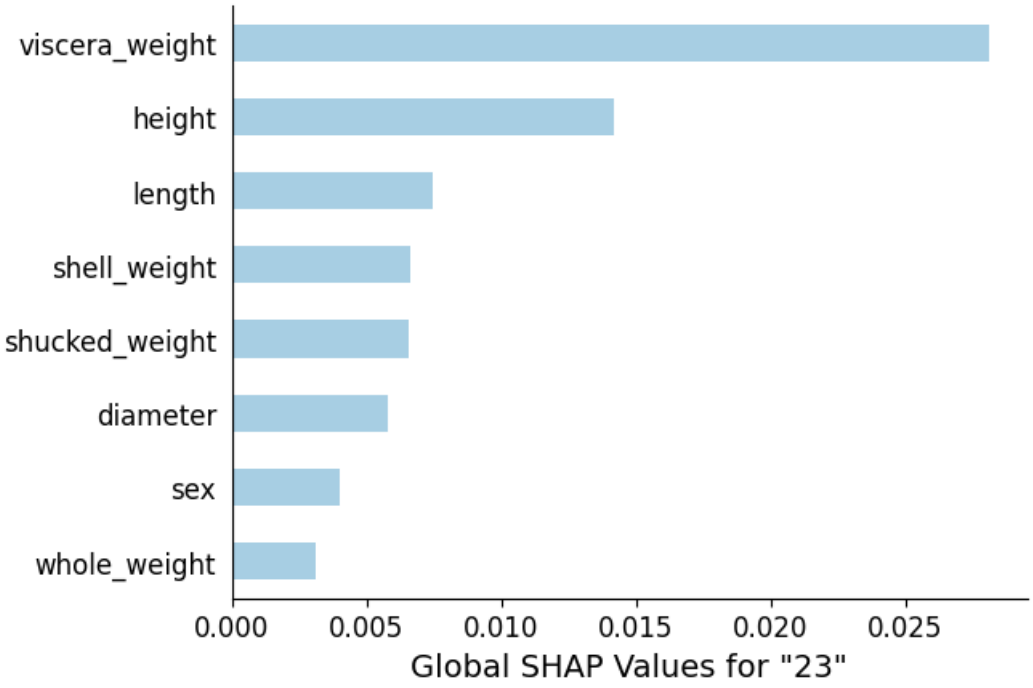
Explanations for "22"

The Model has `8` input features. We computed KernelShap on the dataset `dataset` and display the `10` features with the greatest feature attribution.



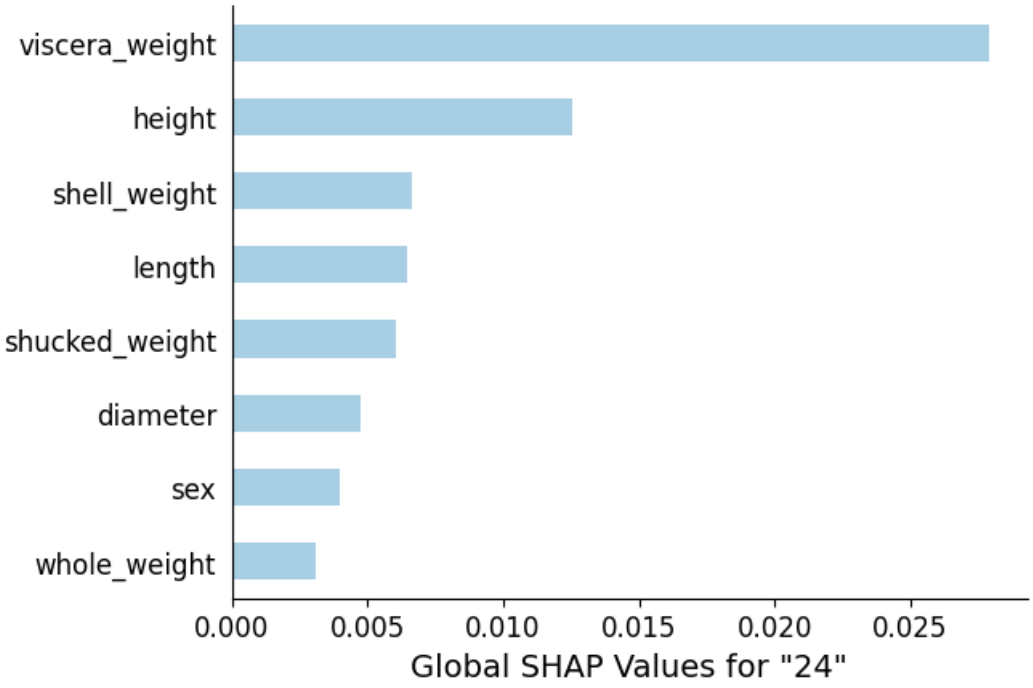
Explanations for "23"

The Model has `8` input features. We computed KernelShap on the dataset `dataset` and display the `10` features with the greatest feature attribution.



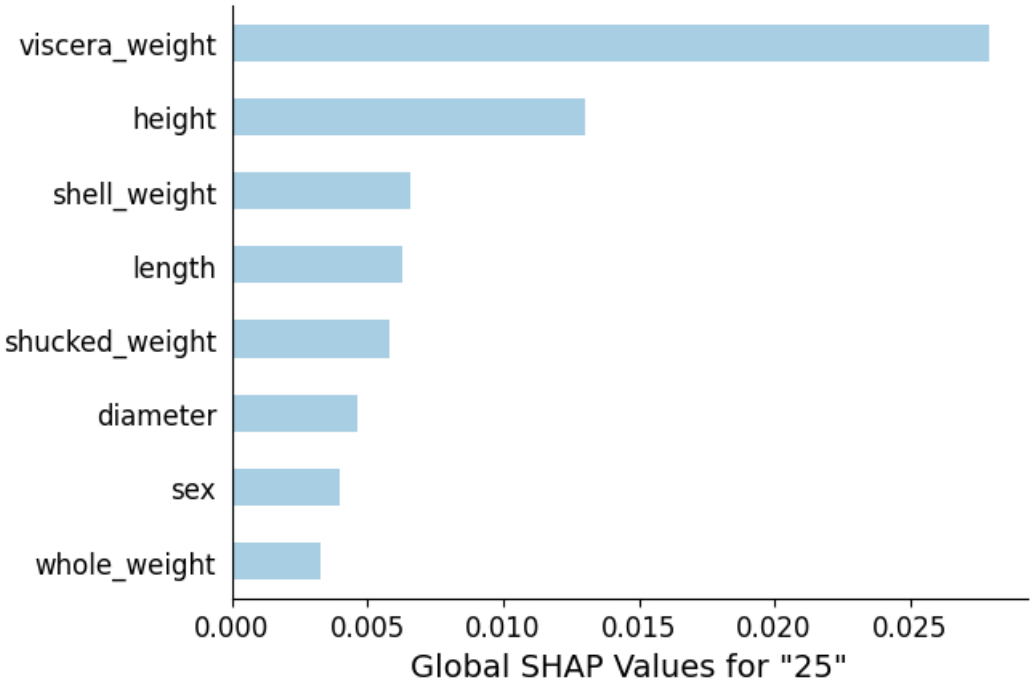
Explanations for "24"

The Model has `8` input features. We computed KernelShap on the dataset `dataset` and display the `10` features with the greatest feature attribution.



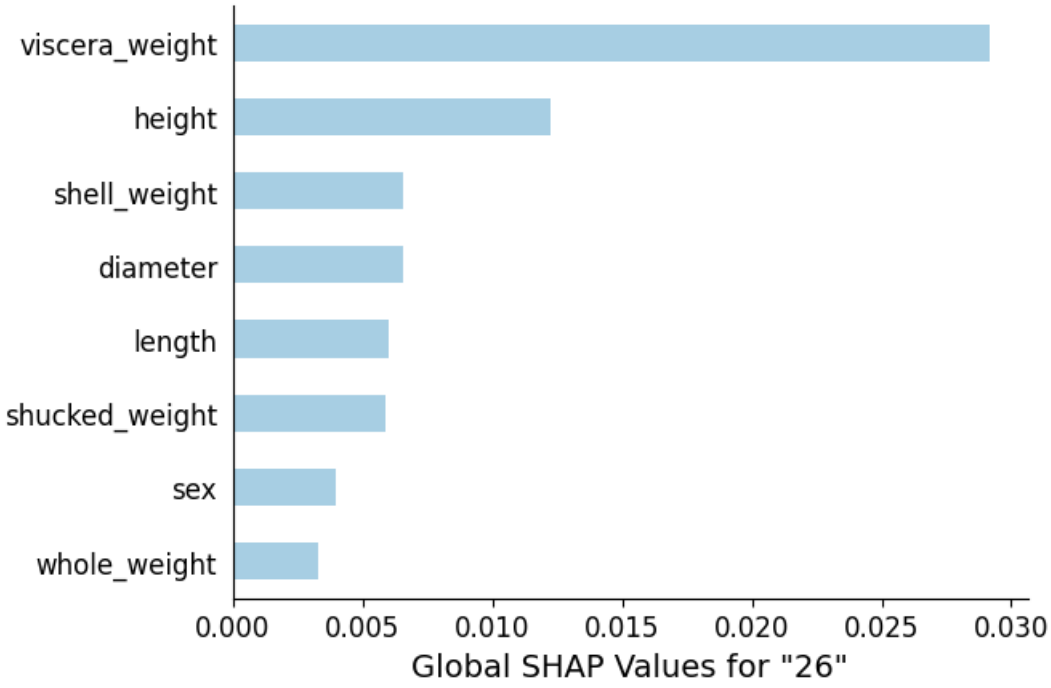
Explanations for "25"

The Model has `8` input features. We computed KernelShap on the dataset `dataset` and display the `10` features with the greatest feature attribution.



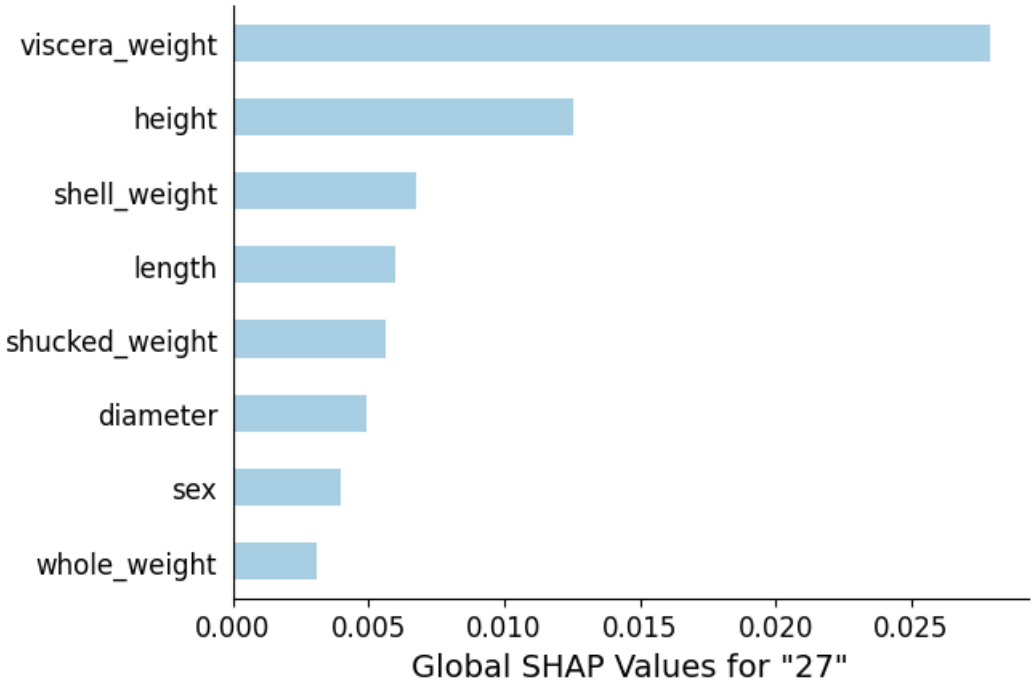
Explanations for "26"

The Model has `8` input features. We computed KernelShap on the dataset `dataset` and display the `10` features with the greatest feature attribution.



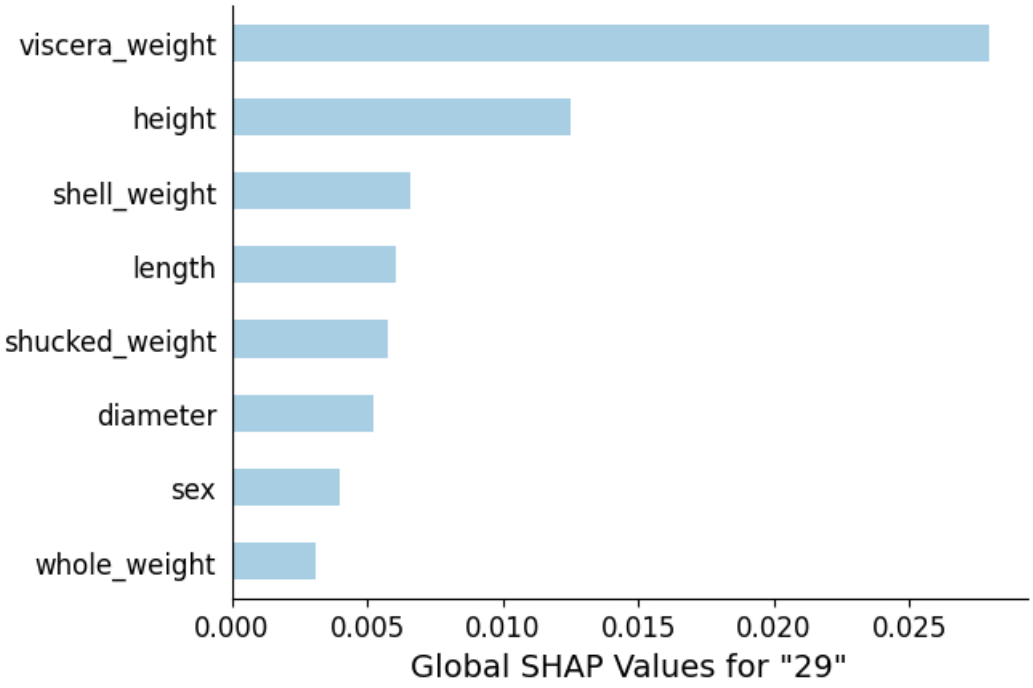
Explanations for "27"

The Model has `8` input features. We computed KernelShap on the dataset `dataset` and display the `10` features with the greatest feature attribution.



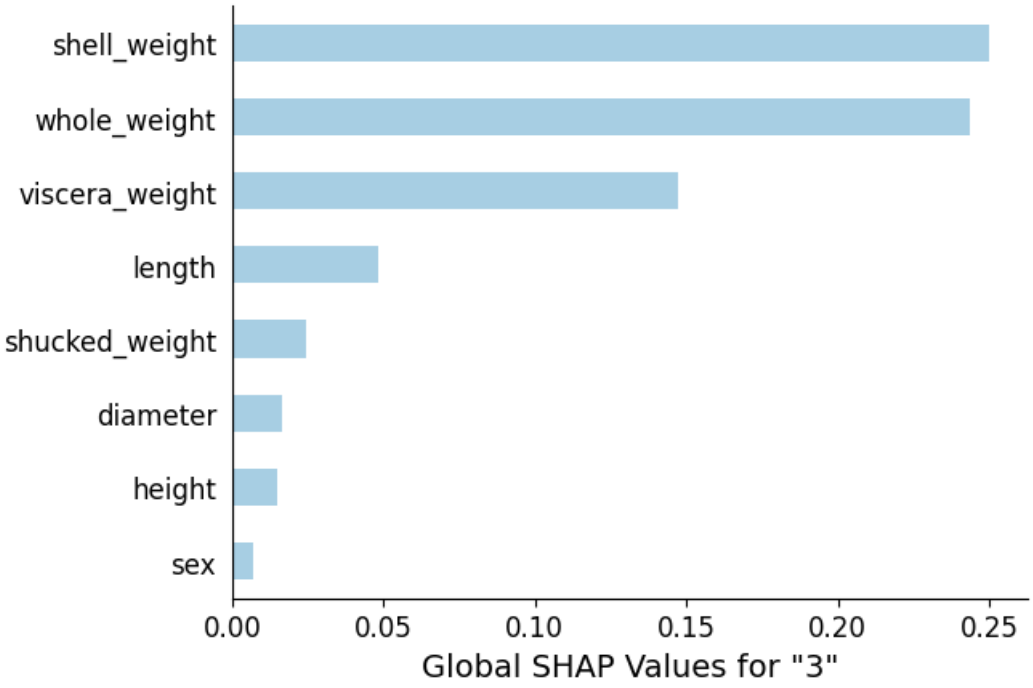
Explanations for "29"

The Model has `8` input features. We computed KernelShap on the dataset `dataset` and display the `10` features with the greatest feature attribution.



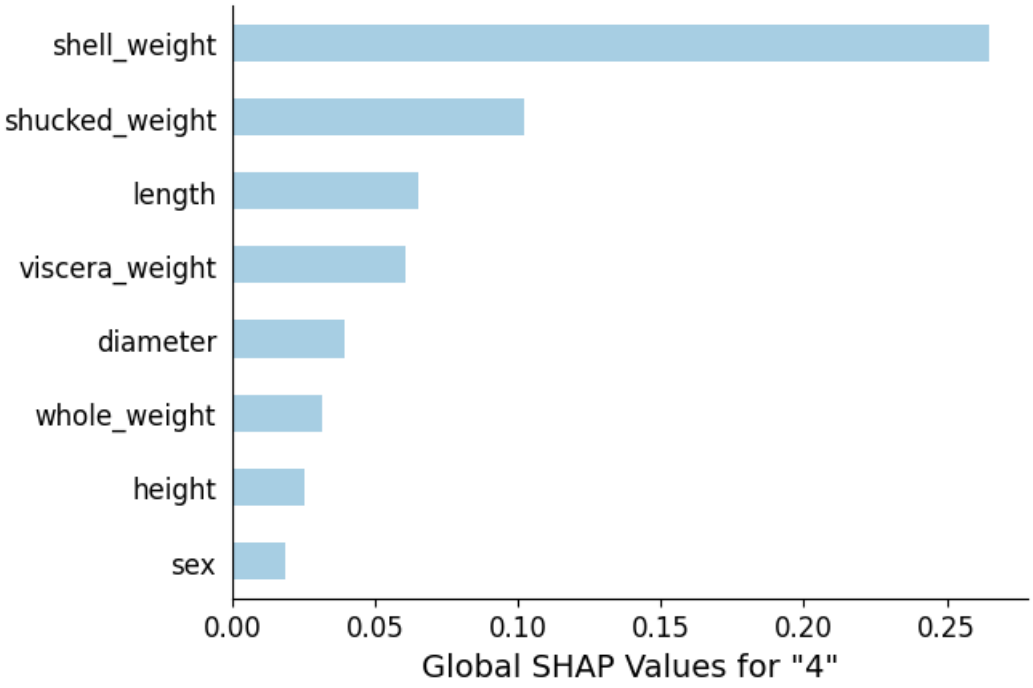
Explanations for "3"

The Model has `8` input features. We computed KernelShap on the dataset `dataset` and display the `10` features with the greatest feature attribution.



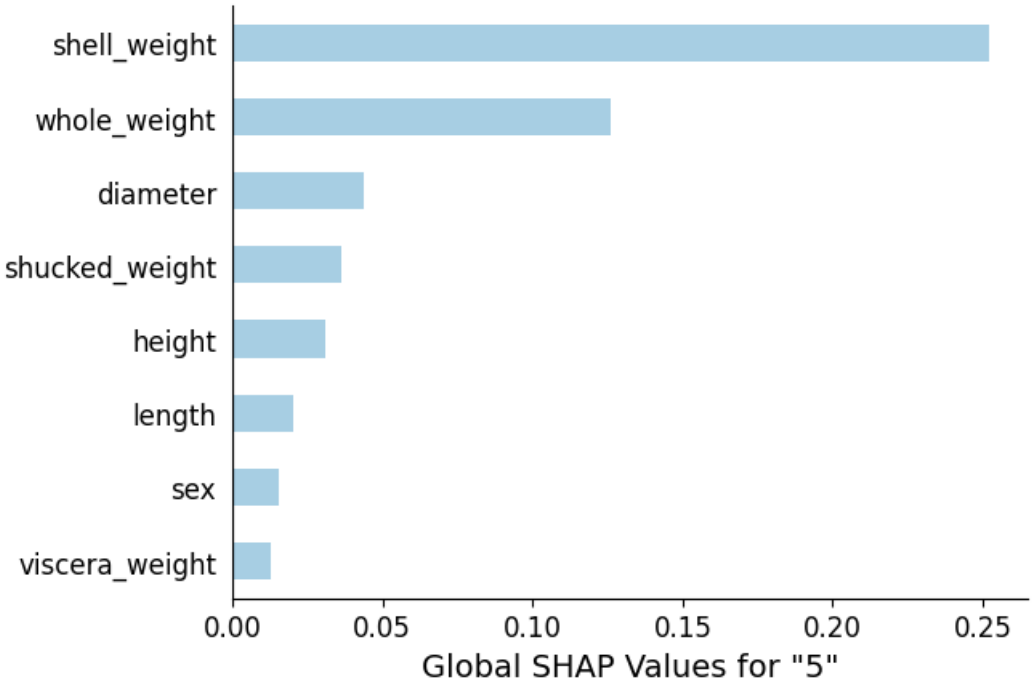
Explanations for "4"

The Model has `8` input features. We computed KernelShap on the dataset `dataset` and display the `10` features with the greatest feature attribution.



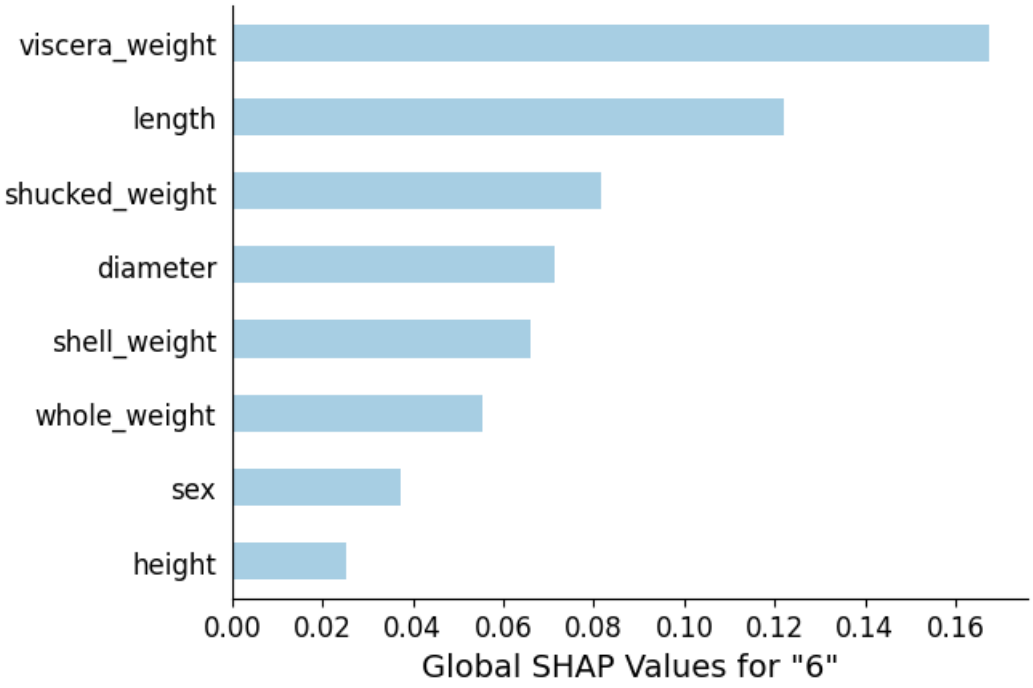
Explanations for "5"

The Model has `8` input features. We computed KernelShap on the dataset `dataset` and display the `10` features with the greatest feature attribution.



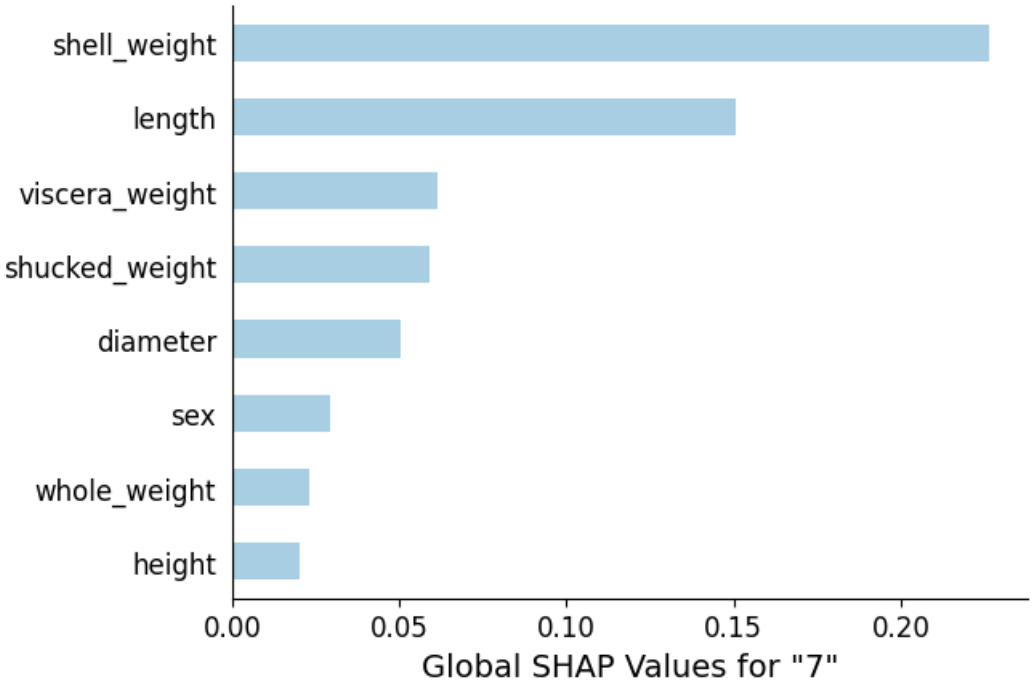
Explanations for "6"

The Model has `8` input features. We computed KernelShap on the dataset `dataset` and display the `10` features with the greatest feature attribution.



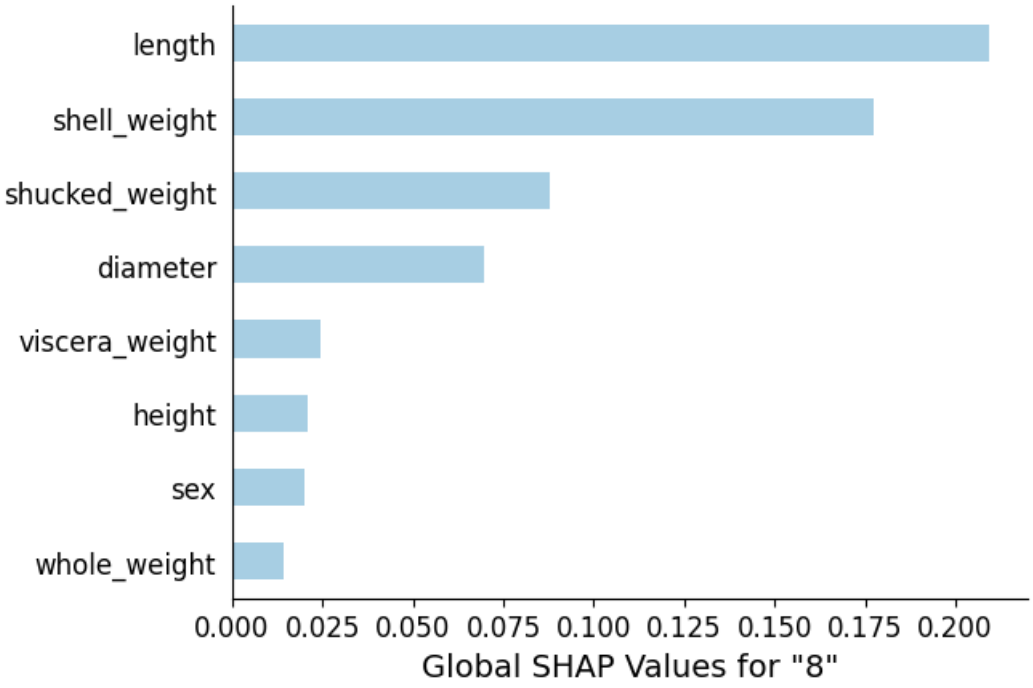
Explanations for "7"

The Model has `8` input features. We computed KernelShap on the dataset `dataset` and display the `10` features with the greatest feature attribution.



Explanations for "8"

The Model has `8` input features. We computed KernelShap on the dataset `dataset` and display the `10` features with the greatest feature attribution.



Explanations for "9"

The Model has `8` input features. We computed KernelShap on the dataset `dataset` and display the `10` features with the greatest feature attribution.
